

# ***The Single*** 1 cup filter

**The Single** is a single filter for professional espresso coffee machines, revolutionary in terms of shape and performance, which allows a uniform, rich and balanced coffee extraction. Born as an alternative for those who love the taste and characteristics of a double extraction, but with only half the quantity of coffee.

## **The Single** is available for:

Nuova Simonelli, Faema, Rancilio, La Spaziale, La Cimbali, Synesso, Marzocco

## **The Single**, one cup filter

- The first and only that produces a compact coffee puck
- No need for a separate coffee grinder-doser setting
- Innovative shape
- Round precision holes

## Internal filter shape

Exclusive shape, absolutely new in the market.  
No gaps, for a homogeneous extraction.  
Maximum use of the coffee puck, which remains intact and compact.  
The filter is left cleaner than with regular filters.

## Different heights

The heights are directly proportional to the quantity of coffee contained by **The Single**. This allows a perfect combination between the settings of double filter (i.e. 18 g) and **The Single** (i.e. 9 g), but using the same settings; it also requires no extra coffee (as it normally happens in a classic one-cup filter), keeping the same taste profile\*.

## External shape of the filter

Half-moon shape, with central holes.  
It balances the extraction speed, making it similar to the double filter, without modifying your grinder's settings or adding extra coffee.

## Round precision holes

Linear extraction, no risk of over-extraction and channeling.

\* taste profile: what you need to expect from **The Single's** extraction, compared to the double, is a single espresso with a more balanced taste, slightly less rich, but with a long-lasting and very delicate aftertaste.

**The Single** is available for:

### Nuova Simonelli - Faema - Rancilio

Nr.	gr.	h.
<b>NFS7.5</b>	7,5 gr	19,5 mm
<b>NFS9/10</b>	9 - 10 gr	21 mm
<b>NFS11.5/12.5</b>	11,5 - 12,5 gr	22,5 mm

The sizes are different and vary according to the group screens of your machine

### Synesso - Marzocco

Nr.	gr.	h.
<b>MAR7.5/8.5</b>	7,5 - 8,5	21,5 mm
<b>MAR8.5/10</b>	8,5 - 10	22,5 mm
<b>MAR11/13</b>	11 - 13	25,5 mm

The sizes are different and vary according to the group screens of your machine

### La Spaziale

Nr.	gr.	h.
<b>SPA7.5</b>	7,5 gr	22,5 mm
<b>SPA10</b>	10 gr	24,5 mm

### La Cimbali

Nr.	gr.	h.
<b>CIM7.5</b>	7,5 gr	20,5 mm
<b>CIM8.5</b>	8,5 gr	21,5 mm
<b>CIM10/11</b>	10 - 11 gr	23 mm
